

New Version 5.0 features the World's Fastest OCR: Process up to 20 pages per second

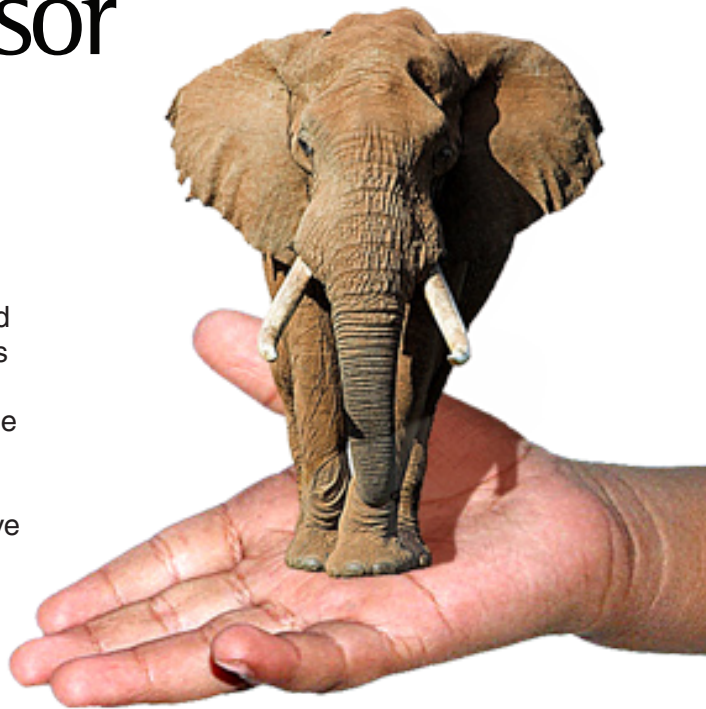

When your PDFs are the best they can be, everyone who uses your files saves time and you save money. For scanned documents, this means advanced image pre-processing, the most accurate, fastest OCR, and the latest image compression. CVista PdfCompressor delivers robust high production 24/7 capability via an intuitive Windows application and a comprehensive command-line interface and API.

What is PdfCompressor?

PdfCompressor can make your documents fully searchable with CVISION's super-accurate OCR. Intelligent pre-processing makes our OCR far more accurate and 20 times faster than leading OCR products and it is available in over 60 languages. PdfCompressor's OCR can process paper-based documents in real-time, accelerating the entire workflow. PdfCompressor combines super-accurate, real-time OCR, including support for multidirectional and low contrast text, with the addition of ICR, for handwritten text, and barcodes.

Using the latest in image compression technology and the new JBIG2 & JPEG2000 compression formats, PdfCompressor makes the most compact, Web-friendly PDF files available. PdfCompressor will compress typical black and white scans by a factor of 5-10x (compared to TIFF G4) and color scans by a factor of 10-100x (compared to JPEG.) Our unmatched text-focused color scan processing ensures maximum data retention, even under high compression. Compressed files look exactly the same, and can be viewed using Adobe Reader. By reducing file size, documents can be emailed, transmitted, accessed, and stored more efficiently.

Uniquely, PdfCompressor combines image processing, real-time OCR, advanced compression, PDF/A, Bates-stamping, PDF options settings, web-optimization, batch multi-threading and encryption all in one step.

Comprehensive, industrial-strength PDF conversion, compression, OCR, and optimization for scanned files or PDFs of any kind.

- Email, transmit, download & upload compressed documents quickly & easily
- Reduce storage & transmission requirements by 10x-100x
- Create instant access to paper-based information with high-speed OCR
- More accurate OCR for more accurate text searches
- View files instantly with web optimization (PDF Streaming)
- Archive documents with full PDF/A compliance
- Produce better-looking files at smaller file-sizes

More Accurate & Faster OCR

PdfCompressor's OCR is the fastest engine available; processing documents instantly in real-time. PdfCompressor can OCR and compress 20 pages per second. In addition to high-speed OCR, the OCR engine contains settings to achieve the highest recognition rates possible.

PdfCompressor's OCR has been tested to be more accurate than leading OCR engines. High accuracy recognition rates are achieved by leveraging advanced image processing techniques including: re-sampling, foreground and background separation, auto-rotation, and font learning.

CVISION's OCR can be configured to your document processing needs: OCR modes are available for highest speed as well as most accurate

	CVISION	Leading OCR Engine	Ratio
25 Black & White Files	11,650	10,151	CVISION has 15% more hits
25 Color Files	4,905	4,421	CVISION has 11% more hits

CVISION's accurate OCR features:

By utilizing PdfCompressor's advanced image processing techniques, the OCR engine has proven to be the most accurate OCR engine available. More accurate OCR translates into more reliable text-searches, more accurate data extractions, and more efficient employees.

OCR Accuracy:

- Utilize an OCR engine 10% more accurate than competing products
- Recognize more characters than competing OCR products
- Leverage OCR dictionaries for legal, medical, and financial industries
- Create more efficient paper-based documents
- Reduce the amount of time spent manually keying in data

CVISION's high speed OCR features:

CVISION has introduced the first-to-market, real-time OCR solution. Now you can instantly OCR your documents in real time. CVISION provides the fastest OCR available, enabling users to process up to 10 pages per core per second on multipage documents.

Real-time Speed:

- OCR processes up to 20 pages per second
- Reduce the number of servers dedicated to processing
- Create a standard where all documents are searchable
- Create a more efficient workflow with real-time OCR
- Access paper-based information instantly
- Maximize office MFPs with Real-time processing
